

CURRENT EDUCATION PROGRAMS IN EGYPTIAN RUSSIAN UNIVERSITY

M.K. Mohamed
Egyptian-Russian University
Tomsk Polytechnic University, 507I

The Egyptian Russian University aims to prepare, develop and refine students' scientific, physical, social, cultural and artistic skills to qualify them to become distinguished graduates that the labor market seeks for them and to shoulder responsibility for the advancement of our beloved country and the rapprochement between the education sector, the business sector and society as well as encouraging the culture of innovation and the university's academic programs are subject to continuous quality reviews to ensure the achievement of those goals.

The main channel for building up dynamic abilities and foresight competencies of educational enterprises and specialists, as well as the focus of foresight re-search in modern science and management practice is working with human re-sources, with the human capital of firms, communities, and countries [1]. In the period from 23 to 25 May 2005, when Russian President Vladimir Putin visited Cairo, an agreement was reached to establish the Egyptian Russian University. According to this visit, an agreement was reached, and according to this agreement, Egypt visited Andrei Fursenko, the Russian Minister of Education at this period, and this visit was in 2006 on the 15th of August in the capital, Moscow. There, the Egyptian and Russian Ministers of Education signed the cooperation agreement in The field of education and scientific research. The fruit of this agreement was the building of the Egyptian-Russian University, and this statement was announced when Russian President Vladimir Putin visited Egypt in Cairo. Egyptian President Mohamed Hosni Mubarak signed the establishment of the Egyptian-Russian University in 2006 on July 15, and this project was implemented under the support of The Egyptian Embassy and the Russian Ministry of Education.

Faculties at the Egyptian Russian University

1. The Faculty of Engineer
2. The Faculty of Pharmacy
3. The Faculty of Dentistry
4. The Faculty of Management Professional Technology and Computers.

Faculty of Engineer consists of five departments

1. Architectural Engineering Department
2. Construction Engineering Department
3. Mathematical and Natural Sciences Department
4. Mechatronics and Robotics Engineering Department
5. Telecommunication Engineering Department

Core purpose of the ERU is to prepare students for future challenges of global competitiveness. In doing so, ERU aims to develop and enhance scientific, physical, social, cultural, and artistic skills of students to be qualified as outstanding graduates who could satisfy market needs, and contribute to the development of their country.

The vision at the Faculty of Engineering at the Egyptian Russian University seeks to be in a prestigious position among Engineering programs in Egypt, Arab and international engineering faculties and to be one of the development elements of the Egyptian-Russian scientific relationships.

Partnership with Russian institutions and related organizations

1. Moscow Power Engineering Institute
2. Izhevsk State Technical University
3. Peoples' Friendship University
4. Institute of Oriental Studies of the Russian Academy of Sciences
5. Tomsk Polytechnic University
6. University State Russia for the Humanitie
7. The Association of Arab Universities

The protocol between The Egyptian-Russian University and Tomsk Polytechnic University have signed an agreement to implement a protocol and a joint study program between the two universities for the study of nuclear power plants, operation, design and engineering. under the auspices of the company Rosatom.

Advantages of Tomsk Polytechnic University (TPU)

1. Tomsk Polytechnic University is one of the most prestigious universities in Russia in nuclear energy.
2. It has its own research reactor and has many laboratories sufficient to train students.
3. Study costs are not expensive, like some universities.
4. It has a very good staff doctors in nuclear energy.

Conclusion

Why Russia? Russia is an amazing country with a long history, traditions, rich and diverse culture. Russia is considered as one of the three most reading countries, and Russian Education is considered as one of the best Education in the world. Every year thousands of international applicants from all over the world enter Russian universities. Preparatory departments and short-term Russian language courses help them adapt to life in a new country. In Russia, some students are eligible to receive state support through scholarships and discounts on tuition.

Russian education is known for its centuries-old history, classical traditions and strong scientific bases, as well as a high level of training, all linked to years of experience and closely linked to modern technologies, a comfortable campus for students, as well as innovative laboratories and laboratories. Nowadays, it has become easy for both international applicants to apply and obtain higher education from one of the prestigious Russian universities, on the basis of either a commercial or a grant granted by the Russian government to him. The government offers and develops support and adaptation programs for international applicants always. Every year scholarships are allocated, and new forms of funding evolve, including international grants and new scholarships. So it good for Egyptian Universities to cooperate with Russian Universities and send more students for studying in Russian and get two diploma one from Egyptian Universities and one from Russian Universities.

FEATURES OF THE IMPLEMENTATION OF THE ERU AND TPU DOUBLE DEGREE PROGRAM

S.S. Khamis
Egyptian-Russian University
Tomsk Polytechnic University, 507I

The main channel for building up dynamic abilities and foresight competencies of educational enterprises and specialists, as well as the focus of foresight research in modern science and management practice is working with human resources, with the human capital of firms, communities, and countries [1]. A double degree is a graduate study program carried out by two different universities, where students complete their study at universities at the same time, or finish their studies at the first university and then start at the second one.

A double degree can be held by different institutions, in different countries or even in different fields of study, as long as there is an agreement between the universities. You can choose to study Business and Law, Engineering and Computer Science, History and Political Sciences, and so on. That's great news for those who want to catch them all, Other than getting two diplomas at the end of your study period [1].

Tomsk Polytechnic University offers ten dual programs among some universities in the world, including Egypt, France, the Czech Republic and Great Britain, and Russian is the official language of instruction at the university; our partner institutions offer curriculum in English or their national language. Students who start a double degree program at a partner university in other countries take courses in English at our school [2].

Today we will talk about the program between TPU and ERU, in 2015, the Egyptian Minister of Education and the President of the Egyptian Russian University decided to create a cooperation program between the Egyptian Russian University and Tomsk University of Applied Sciences. At the end of the program, graduates will obtain a double degree from Tomsk Polytechnic University and the Egyptian Russian
